

THE NUHOP CENTER FOR EXPERIENTIAL LEARNING

The America's Cup Challenge™

The beach of any resort and conference center is the perfect location for this amusing event. The Americas Cup Challenge requires participants to create a functional boat with an array of materials from pvc pipe to twine. Teams are formed and given a certain amount of time to design, create, and build their boats. After all boats are complete, it is off to the races as teams compete on the shores of the lakes of Ohio.

The Adventure Trek

The Adventure Trek Program is self-facilitated event centered around the concepts of friendly competition, collaboration and strategic decision making. During this event teams are asked to complete a series of problem solving activities called initiatives. Each initiative is worth a certain number of points and each team is trying to earn the highest number of points at each activity. In order to find each initiative, teams must utilize the provided map of the resort and conference center to correctly identify each initiative's location. Rules can change at any point during The Adventure Trek Program and at times competing teams must collaborate to meet peak performance and the overall objectives of this highly interactive program.
