

THE NUHOP CENTER FOR EXPERIENTIAL LEARNING

The GPS Adventure™

Not All Who Wander Are Lost

This team development program has taken the use of modern technology to a new dimension. During this program teams are formed and taught basic GPS (Global Positioning System) Skills. Once the team has a grasp on using this technology to their advantage, they set off on an adventure around the resort and conference center. During the GPS Adventure teams must navigate around the site trying to find pinpointed locations. At each of these locations, the teams must either participate in a physical challenge, puzzle, or debrief questions in order to get their next set of coordinates. The event is intense with physical and mental activity. This is The Nuhop Center's modern day version of the old orienteering team challenges.

The Daytona Challenge™

"Strategy is better than strength." - Hausa Legend

The Daytona Challenge is team development and performance program centered around the theme of friendly competition.

During The Daytona Challenge, teams are formed and given the task of building a racecar out of a limited set of materials. Each team is required to follow the same specs to build their cars but are given creative freedom within their designs. After all Daytona Challenge Cars are carefully designed and assembled, the competing teams gather for the pre race parade. Once the parade is complete, it is off to the pits to prepare for the main event. Laughter abounds as teams compete to for the champion title of The Daytona Challenge.
