

MISSION POSSIBLE

The Nuhop Center

“Overcoming barriers to performance is how groups become teams.”

Katzenbach & Smith

A High Tech Team Event Achieve Your Mission!

Mission Possible is Nuhop's version of a high energy, fun and engaging scavenger hunt. We have taken the best practices of reality television and modern day technology to create a scavenger hunt that your colleagues will be talking about for years to come.

Mission Possible programs begin by dividing your group into teams of 6-8 people. Each team is equipped with either a Smart Phone or I Pod Touch prior to the beginning of the race. Traditional hunts equip you with a scavenger hunt list, a digital camera, a collection pack and a map of the venue or city whereas Mission Possible sends you these staples

with tools you use on a daily basis i.e. picture messaging, voice messaging, video messaging, text messages, e-mails and links to specific URL's and blogs. Just to keep things a bit on the old school side, we prepare a few traditional scavenger hunt exercises that you will engage in while on The Mission Possible Challenge.

Just like the reality show The Amazing Race, teams will race through the city or around the chosen venue to solve puzzles, decipher clues, earn points and work together as a team to achieve ultimate team success. Each Mission Possible Event is

customized to that specific location or venue.

Each team starts out on even ground, but once the race begins it is their choice if it is every team for themselves or if they form alliances to achieve greater success. As each team completes a mission they send the answer or notification that the mission has been completed to mission control via smart phone or by posting to The Mission Possible Blog. When all the events have been completed and all teams have returned, teams reconnect and are asked to reflect upon their epic journey prior to celebrating their successes in the post event awards ceremony.
